

## Time recording

...your time is your money as well

### Comprehensive effort, transparent and fair settlement - strengthen trust

Our Time Management module is practical and straightforward - that's precisely what it's good for. We have optimized our module for smooth and efficient operation, rather than "overloading" it with more or less meaningful project management features. It's about fast, uncomplicated and transparent time tracking. Not more but also not less.

Our time recording enables the detailed evaluation and creation of in-house proof of activity or even with clients. Annually, monthly, daily, according to customer, project, order or employee - flexible and entirely according to your requirements.

This makes it easy to understand when and at what time your employees worked on individual orders or projects.

Managers have the opportunity to pre-plan entire projects or assignments about the upcoming tasks and to provide them with scheduled, employee-specific individual tasks. The employees can report the required time for these tasks flexibly, transparently and with little effort after processing directly in the project or on behalf. Comprehensive export and printing options allow the further processing of the evaluations or direct forwarding to the customer.

This is another significant advantage because the cost pressure on the market is growing and companies - especially in the project business - have to exhaust all possibilities of cost-saving and efficiency increase.

Our time recording module makes exactly this possible: You can effortlessly create comprehensive and detailed evaluations - as a transparent, fair proof of the project or order-related time spent on your clients or as a basis for settling accounts with employees. Flexible, customizable dashboards always provide you with up-to-date information about all relevant expenses associated with your customers and projects.

Any additional expenses in the order or project can be justified on a solid, transparent basis.

Settlements can be implemented faster because an evaluation is possible at any time with little effort. On the one hand, this optimizes the planning for your invoice, and on the other hand, it creates trust among your customers.

Your employees record their times more comprehensively, precisely and promptly, because the time and attendance involved have become manageable and efficient.

Benefit from the advantages of our module time recording! For your clients, your employees and last but not least for your entire company.

If you are interested in this module or other solutions, we will gladly send you an overview of our CRM system.

You will always receive further information in a personal conversation.
